Station Paper No. 15 January 1949

PUBLICATIONS OF THE
LAKE STATES FOREST EXPERIMENT STATION
1923 - 1948

Lake States Forest Experiment Station
University Farm, St. Paul 1, Minnesota
E. L. DEMMON, Director

PUBLICATIONS OF THE

LAKE STATES FOREST EXPERIMENT STATION 1/

1923-1948

TABLE OF CONTENTS

Class No.		Page
	Foreword	ii
1.	Forest management and silviculture	1
2.	Regeneration (seed, nursery, planting)	14
3.	Mensuration (growth, volume, yield, sampling)	24
4.	Protection	31
	a. Fire	31
	b. Insects and diseases	33
	c. Wildlife	34
5.	Forest survey (forest resources)	37
6.	Forest economics	43
7.	Forest influences (streamflow, eorsion control, climate, shelterbelts)	51
8.	General	57
9.	Forest Research Digest	63
	Index (by author)	69

1/ Maintained by the U. S. Department of Agriculture, Forest Service, in cooperation with the University of Minnesota, at University Farm, St. Paul 1, Minnesota.

FOREWORD

Constant research is needed to guide most modern day activities along the best way, and forestry is no exception. However, research can be put to use only when its results are made known. For this reason it is almost as important to publish findings promptly as it is to discover them.

From this point of view the Lake States Forest Experiment Station has set a good record during its first 25 years. Its findings have been made available through nearly 1,000 publications.

The complete list of these publications has been compiled by Helen A. Woodworth, in charge of files and library at the Lake States Forest Experiment Station. The titles have been arranged into nine classes according to subject matter. Within each class the titles have been listed alphabetically by authors, and the writings of each author have been arranged in chronological order. Each publication has been assigned a number. At the end of the paper there is an index giving the numbers of the articles published by each author.

All publications available for general distribution are designated by *. Those in limited supply, which can be supplied only to schools, libraries, or conservation agencies are designated by **. All other publications listed are no longer available for distribution.

1. FOREST MANAGEMENT AND SILVICULTURE

** 1. Aikman, J M. Native vegetation of the region. Sec. 13, "Possibilities of Shelterbelt Planting in the Plains Region," pp. 155-174. 1935.

* 2. Arbogast, Carl F. Young hardwood crop trees can be selected. Tech. Note No. 281, 1 p., mimeo. Oct. 1947.

3. Averell, James L. Review of "Om Sommarvarmens Innflydelse På Årringbredden (The Influence of Summer-Temperature on the Width of the Annual Ring)," by Erling Eide. 1926. Jour. For. 26(3): 370-371. March 1928.

4. _____ Review of "Vaxttidsundersökningar Å Tall Och Gran (Investigation of the Growth Period of Pine and Spruce)," by Lars Gunnar Romell. 1925. Jour. For 26(3): 371-373. March 1928.

5. _____ How much does it cost to thin? Jour For. 28(4): 573-574. April 1930

6. Bates, C. G. Review of "Foundations of Silviculture upon an Ecological Basis," by James W. Toumey. 438 pp. 1928 Jour. For. 26(8): 1020-1023. Dec. 1928.

7 _____ Review of "The Root System of Pine (Pinus sylvestris): A Morphological Investigation," by E. Laitakari. 1927 Jour. For. 26(8): 1034-1037. Dec. 1928

8. Brown, R.M., and Petheram, H.D. Conversion of jack pine into red and white pine stands. Jour. For. 24(3): 265-271. March 1926.

* 9. Engle, L.G. Skidding damage by tractors and horses in selective logging of northern hardwoods. Tech. Note No. 277, 1 p., mimeo. July 1947.

10. _____ Girdling northern hardwood wolf trees. Jour. For. 46(12): 925-926. Dec. 1948.

11. Eyre, F. H. Aspen competition in Norway pine plantations. Jour. For. 31(3): 318-321. March 1933.

12 _____ Possibilities of release cuttings in Minnesota forests. Jour. For. 31(4): 436-440. April 1933.

13. _____ and Blythe, R.H. Mortality in selectively cut northern hardwoods. Service Bull. 18(16): July 30, 1934. (Prepared for 39th Ann. meeting of Mich. Acad. of Sci., Arts, and Letters, March 17, 1934) (Also mimeographed.)

14. _____ Dispersal of jack-pine seed from seed trees and slash. Papers Mich. Acad. Sci., Arts and Letters 21: 279-284. 1935. (Publ. 1936.)

15. Young, Leigh J., and Eyre, F. H. Release cuttings in plantations of white and Norway Pine. Papers Mich. Acad. Sci., Arts and Letters 22: 301-320. 1936. (Publ. 1937.)

16. Eyre, F.H., and Neetzel, J.R. Applicability of the selection method in northern hardwoods. Jour. For. 35(4): 353-358. April 1937.

17. _____ Can jack pine be regenerated without fire? Jour. For 36(10): 1067-1072. Oct. 1938.

18. _____ Silvicultural management of northern hardwoods. Jour. For. 37(7): 719-721. Sept. 1939.

*19. _____ and Neetzel, John R. Practical cutting methods for northern hardwoods. Papers Mich. Acad. Sci., Arts, and Letters 24: 197-208. Part I, 1938. (Publ. 1939)

*20. _____ and LeBarron, Russell K. Management of jack pine stands in the Lake States. USDA Tech. Bull. No. 863, 66 pp., illus. Feb. 1944.

21. _____ and Zehngraff, Paul J. Supplying Lake States needs for pine pulpwood through thinning. Canadian Pulp & Paper Assoc , Woodlands Sec. Index No. 803 (A-1). June 1945.

22. _____ and _____ Thinnings for pulpwood increase timber yield. Tech. Note No. 238, 1 p., mimeo. July 1945.

23. _____ and _____ Spacing of young red pine. Sta. Paper No. 8, 6 pp., mimeo. June 1947.

*24. _____ and _____ Red pine management in Minnesota. USDA Circ. No. 778, 70 pp., illus. May 1948.

25. Farrington, Robert A. Natural rotation for Lake States oak. Wis. Conserv. Bull. 7(7): 4. July 1942.

26. Gevorkiantz, S.R. Translation of Russian article by Junack, "Thinning Pine Forests." mimeo. Feb. 1935.

27. _____ and Roe, E.I. Photoperiodism in forestry. Jour. For. 33(6): 599-602. June 1935.

28. _____, Rudolf, P.O., and Zehngraff, P.J. A tree classification for aspen, jack pine, and second-growth red pine. Jour. For. 41(4): 268-274. April 1943.

29. Holmberg, L.A. Is suppression a possible cause of bird's-eye maple? Jour. For. 31(8): 968-970. Dec. 1933.

30. Kittredge, Joseph, Jr., and Belyea, Harold C. Reproduction with fire protection in the Adirondacks. Jour. For. 21(8): 784-787. Dec. 1923.

31. _____ It takes longer to grow white pine but farmers find it a profitable crop, figures indicate. Detroit News. Feb. 24, 1924.

32 _____ A proposed classification of the forest types of the Lake States. Jour. For. 23(11): 890-895. Nov. 1925.

33. _____ Thinning young red pine. Jour. For. 25(5): 555-559. May 1927.

34. _____ Management of the maple-basswood type in northern Minnesota. Jour. For. 25(8): 1040-1043. Dec. 1927.

35. _____ The use of soil surveys in forestry. 1st Internatl. Cong. Soil Sci., Proc. & Papers 4: 562-565 1928.

36. _____ The importance of time and rate of change in forest soil investigations. Proc. Internatl. Congress of Forestry Experiment Stations, Stockholm. pp. 479-484. 1929.

37. _____ and Olson, George T. Sampling forest types. Papers Mich. Acad. Sci., Arts and Letters 15: 229-237. 1931. (Publ. 1932.)

38. Alway, F.J., Kittredge, Joseph Jr., and Methley, W.J. Composition of the forest floor layers under different forest types on the same soil type. Soil Science 36(5): 387-398. Nov. 1933.

39. Kittredge, Joseph Jr. Evidence of the rate of forest succession on Star Island, Minnesota. Ecology 15(1): 24-35. Jan. 1934.

40. Lake States Forest Experiment Station. Release of young Norway pine from aspen competition. Jour. For. 33(2): 174-175. Feb. 1935.

*41. _____ Extensions in the range of Lake States trees. Jour. For. 36(4): 437-438. April 1938. (Tech. Note No. 129.)

*42. _____. Some notes on jack pine. Forestry Chronicle 15(3): 172-174. Sept. 1939. (Comprises Tech. Notes Nos. 148-151.)

43. _____. Field studies in selective logging - Upper Peninsula Experimental Forest, Dukes, Michigan. Mimeo. Sept. 1939.

*44. _____ Growth of northern hardwoods after partial cutting. Tech. Note No. 6, 1 p., mimeo. Oct. 1928.

*45. _____ What happens to millions of little trees in a virgin hardwood forest. Tech. Note No. 9, 1 p., mimeo. March 1929.

*46. _____. Breakage no obstacle to selective logging. Tech. Note No. 16, 1 p., mimeo. Aug. 1929

*47. _____ How much light do forest trees need? Tech. Note No. 17, 1 p., mimeo. Sept. 1929.

*48. _____ Ordinary white daylight is best for growth of trees. Tech. Note No. 18, 1 p., mimeo. Sept. 1929.

*49. _____ Ground vegetation - an indicator of forest growth. Tech. Note No. 25, 1 p., mimeo. Sept. 1930.

*50. _____ More light in the forest? Tech. Note No. 26, 1 p., mimeo. Sept. 1930.

*51. _____ Germination and survival of conifers under aspen. Tech. Note No. 28, 1 p., mimeo. Sept. 1930.

*52. _____ Drought resistance of forest plants. Tech. Note No. 32, 1 p., mimeo. Feb. 1931.

*53. _____ Effect of forest cover on drought injury to undergrowth. Tech. Note No. 33, 1 p., mimeo. Feb. 1931.

*54. _____ Sunlight and forest growth. Tech. Note No. 35, 1 p., mimeo. Feb. 1931.

*55. _____ Is light important immediately after germination? Tech. Note No. 46, 1 p., mimeo. Dec. 1931.

*56. _____ Jack pine - pulpwood or sawlogs? Tech. Note No. 51, 1 p., mimeo. May 1932.

*57. _____ Growing bigger and better aspen. Tech. Note No. 52, 1 p., mimeo. May 1932.

*58. _____ Aspen and birch follow pine cutting in northeastern Minnesota. Tech. Note No. 53, 1 p., mimeo. May 1932.

*59. _____ How to cut black spruce. Tech. Note No. 54, 1 p., mimeo. May 1932.

*60. _____ Release cuttings needed in natural second-growth stands. Tech. Note No. 61, 1 p., mimeo. Feb. 1933.

*61. _____ How to thin young Norway pine. Tech. Note No. 64, 1 p., mimeo. Nov. 1933.

*62. _____ Paper birch - a windfirm tree. Tech. Note No. 67, 1 p., mimeo. Nov. 1933.

*63. _____ Damage to young growth by logging. Tech. Note No. 76, 1 p., mimeo. May 1934.

*64. _____ Mortality in selectively cut northern hardwoods. Tech. Note No. 79, 1 p., mimeo. May 1934.

*65. _____ Is jack pine a prolific seeder? Tech. Note No. 84, 1 p., mimeo. May 1934.

*66. _____ Soils as a guide in forest management. Tech. Note No. 91, 1 p., mimeo. Aug. 1935.

*67. _____ Growth rate of aspen indicates potential forest cover. Tech. Note No. 92, 1 p., mimeo. Aug. 1935.

*68. _____ Regional variation in composition of old-growth northern hardwood forests. Tech. Note No. 95, 1 p. mimeo. Aug. 1935.

*69. _____ What trees withstand drought best? Tech. Note No. 97, 1 p., mimeo. Aug. 1935.

*70. _____ Soil treatment greatly increases jack pine reproduction. Tech. Note No. 101, 1 p., mimeo. Jan. 1936.

*71. _____ Natural reproduction is affected by weather conditions. Tech. Note No. 105, 1 p., mimeo. Jan. 1936.

*72. _____ Large quantities of seed produced by northern hardwood forest. Tech. Note No. 118, 1 p., mimeo. May 1936.

*73. _____ Windfirmness of black spruce in residual stands. Tech. Note No. 119, 1 p., mimeo. May 1936.

*74. _____ Extensions in the range of Lake States trees. Tech. Note No. 129, 1 p., mimeo. Sept. 1937.

*75. _____ White spruce on alkaline soils. Tech. Note No. 134, 1 p., mimeo. Feb. 1938.

*76. _____ How to obtain effective dispersal of jack pine seed. Tech. Note No. 136, 1 p., mimeo. Feb. 1938.

*77. _____ Earlier returns from thinned red pine. Tech. Note No. 138, 1 p., mimeo. Feb. 1938.

*78. _____ When to cut jack pine. Tech. Note No. 141, 1 p., mimeo. Feb. 1938.

*79. _____ Black spruce maintains a year-round seed supply. Tech. Note. No. 146, 1 p., mimeo. April 1939.

*80. _____ Black spruce seed is a limited air traveler. Tech. Note No. 147, 1 p., mimeo., illus. April 1939

*81. _____ Comparative resistance of native Wisconsin trees to snow breakage. Tech. Note No. 152, 1 p., mimeo. April 1939.

*82. _____ Thinned stands fill up rapidly. Tech. Note No. 160, 1 p., mimeo. May 1940.

*83. _____ Effectiveness of soil scarification in promoting jack pine reproduction. Tech. Note No. 161, 1 p., mimeo. May 1940.

*84. _____ Relationship of temperature to dispersal of jack pine seeds. Tech. Note No. 164, 1 p., mimeo. May 1940.

*85. _____ Jack pine cones in slash open in midsummer. Tech. Note No. 165, 1 p., mimeo. May 1940.

*86. _____ Light cuttings in hardwoods show high quality increment. Tech. Note No. 166, 1 p., mimeo. May 1940.

*87. _____ Do young second-growth northern hardwoods need care? Tech. Note No. 167, 1 p., mimeo. May 1940.

*88. _____ Effect of season on germination and early survival. Tech. Note No. 168, 1 p., mimeo. May 1940.

*89. _____ Thinnings assume commercial importance. Tech. Note No. 186, 1 p., mimeo. March 1942.

*90. _____ Black spruce should not be cut clean. Tech. Note No. 187, 1 p., mimeo. March 1942.

*91. _____ Jack pine reverts to balsam fir in northeastern Minnesota. Tech. Note No. 188, 1 p., mimeo. March 1942.

*92. _____ Upland black spruce not a stable type. Tech. Note No. 189, 1 p., mimeo. March 1942.

*93. _____ Northern hardwoods can be cut selectively at short intervals. Tech. Note No. 219, 1 p., mimeo. April 1944.

*94. _____ Does diameter growth response hold above d.b.h.? Tech. Note No. 222, 1 p., mimeo. April 1944.

*95. LeBarron, Russell K., and Eyre, Francis H. The influence of soil treatment on jack-pine reproduction. Papers Mich. Acad. Sci., Arts, and Letters 23: 307-310. 1937. (Publ. 1938.)

**96. _____ and _____ The release of seeds from jack pine cones. Jour. For. 37(4): 305-309. April 1939.

97. _____ Fire babies. M.A.C. Gopher. Nov. 1939.

*98. _____ Partial cutting in black spruce in the Lake States. Papers Mich. Acad. Sci., Arts, and Letters 28: 249-260. 1942. (Publ. 1943.)

*99. _____ Influence of controllable environmental conditions on regeneration of jack pine and black spruce. Jour. Agr. Res. 68(3): 97-119. Feb. 1944.

100. _____ Review of "Growth and Occurrence of Spruce and Fir on Pulpwood Lands in Northern Michigan," by A. B. Bowman, 82 pp. 1944. Jour. For. 43(2): 149-150. Feb. 1945.

101. _____ Review of "The Peats of New Jersey and their Utilization. Part A, Nature and Origin of Peat. Composition and Utilization," by Selman A. Waksman. Part B, "The Peat Resources of New Jersey," by Selman A. Waksman, H. Schulhoff, C. A Hickman, T. C. Gordon, and S. C. Stevens. 1942 and 1945. Jour. For. 43(2): 150-151. Feb. 1945.

*102. _____ What causes mortality in black spruce after partial cutting? Tech. Note No. 231, 1 p., mimeo. April 1943.

**103. _____ Annotated bibliography of black spruce. 10 pp., mimeo. May 1945.

**104. _____ Adjustment of black spruce root systems to increasing depth of peat. Ecology 26(3): 309-311. July 1945.

*105. _____ Light cutting in black spruce is practicable. Jour For. 43(7): 486-489. July 1945.

*106. _____ Mineral soil is favorable seedbed for spruce and fir. Tech. Note No. 237, 1 p., mimeo. July 1945.

*107. _____ Shrub growth hinders black spruce reproduction in swamps. Tech. Note No. 240, 1 p., mimeo. July 1945.

*108. _____ Silvicultural management of black spruce in Minnesota. USDA Circ. No. 791, 60 pp., illus. Oct. 1948.

109. Marshall, G. E., and Cummings, M. J. Slash disposal in northern Minnesota. Amer. Lumberman 2698: 84-85. illus. Jan. 29, 1927.

110. Mitchell, J. A. Henry Ford's logging operation. Amer. Lumberman 2539: 60-61. Jan. 12, 1924.

111. _____ Soil building and soil destruction. Parks and Recreation. May-June 1925.

112. Mowat, E. L. Review of "The Growth of Hemlock Before and After Release from Suppression," by Robert Marshall. 1927. Jour. For. 26(3): 374-375. March 1928.

113. _____ The Upper Peninsula Forest Experiment Station--What it does and aims to do. Mich. State College Forestry Annual. April 1928.

114. _____ Some of the activities of the Upper Peninsula national forest experiment station. Development Bureau News. Aug. 1, 1928.

115. _____ Breakage no obstacle to selective logging. Jour. For. 28(1): 99-100. Jan. 1930.

*116. Neff, L. P. The right kind of black spruce growing stock pays off. Tech. Note No. 298, 1 p., mimeo. July 1948.

966. _____ The vast gulf between democracy and tyranny.
Land Policy Rev. 5(5): 3-6. May 1942.

967. _____ Legalizing destructive logging practices.
St. Paul Pioneer Press. June 13, 1943.

968. January 1935.
Research - basis of sound practice.
Policy for development of experimental forests and ranges.
Effect of raking litter.
Past history of shelterbelts.
Relationship between marsh water levels and lake levels.
Gifford Pinchot returns to Washington.
Simplified type scheme for forest surveys.
Land utilization in Minnesota - a state program for the cut-over lands.
The present set-up of experiment stations remains unchanged.
Morning versus evening deer counts.
A guide for determining the density of stocking in even-aged stands
Release of young Norway pine from aspen competition.
Branch stations of the Lake States Forest Experiment Station.

969. February 1935.
Size of stock in relation to animal injury.
How to reduce sprouting of undesirable species.
Fuel wood sales and immediate cash return from cultural work.
One reason for the sparsity of Norway pine reproduction.
Ducks and the drought.
Interception of rainfall by forest canopy.
A small forest nursery.
Indirect rabbit control.
How fast do furrows fill in?
Board foot content of lumber.
Furrowing and grading improve survival in planting.
Census of agriculture.

970. March 1935.
Annual investigative meeting.
Danger of Ips damage following cultural operation.
A new planting chance for white pine.
Thinning in aspen.
Girdling reduces cost of cultural work in second-growth northern hardwood stands.
Border cuttings as an aid to regeneration.
Investigation of rodent damage.
Agreement between Forest Service and Biological Survey.

971. April 1935.
Seed germination technique.
Forests and circulation of water.
Soil temperature affects germination and development of white pine seedlings.
Girdling of northern hardwoods.
The growth rate of natural stands.
Cultivation of plantations.
Bark beetles and blue stain.
Research and Acquisition.
The soil as a guide to stand treatment.

972. May 1935.
Seventeenth century Italians understood forest-streamflow relationships.
Recent results from seed dormancy tests.
Girdling and poisoning.
Effect of soil temperature on growth of thinned stands.
Toward better survival.
A comparison of seedling and transplant stock.
How much wood in a cord?
Selective logging by lumber companies.
The seasonal food habits of the snowshoe hare.

973. June 1935.
Temperatures in planting furrows.
Power saw pruning.
New law in Wisconsin.
A method of estimating a deficiency of available phosphorus.
A new disease of Norway pine.
Information on a common rot.
Effects of burning and pasturing on the water absorption of forest soils.
Governor's conservation conference.
Natural vegetation map of the Lake States.

974. July 1935
Social responsibilities of scientists.
Large scale converting factors.
Vegetative reproduction of pin cherry.
Shelterbelt report.
What factors reduce plantation survival?
Effect of cold storage on germination.
Winter habits of deer.
Effects of forest on nitrification of the soil.
Science meeting.
Pre-germination treatments for Lake States trees.
Dye test for germination.
Silvicultural effects of release cuttings in plantations of white and Norway pine.

975. August 1935.
The shelterbelt project.
Condition of Minnesota forests.
Injury to planting stock from exposure.
Wind damage on the Superior.
Reforestation by airplane.
Seed treatments for shelterbelt species.
Tent caterpillar infestations.
Effect of pruning on height growth.

976. September 1935.
The Chippewa branch.
New forest experiment station.
Girdling fire cherry.
New hardwood nursery.
Seedling exposure.
Chief forester visits Region Nine.
Spruce seeding methods.
Sample plot technique.
Effect of cover on run-off.
Game food planting.
Forest taxation.
Forest fire hazard.
Forest survey report.
Volume of tops and limbs.
Water relation of plants in semi-arid soils.

977. October 1935.
How many ducks?
Soil erosion station.
Fall vs. spring planting on Superior forest.
Administrative jack pine study.
Creeping jenny a menace to seedlings.
How much jack pine seed on an acre?
Artificial pruning.
Stumpage prices in northern Minnesota.
Shelterbelt investigative meeting.
Relative merits of strips and plots in cruising.
The financial practicability of sustained yields in the northern hemlock-hardwood forest.
Conversion tables and charts.
Soil preparation aids establishment of seedlings.
Cash value of shelterbelts in Canada.

978. November 1935.
Brush fences facilitate rabbit snaring.
Wood handbook.
The Superior branch station.
Canadian planting observations.
The westernmost outpost of hemlock in Minnesota.
The wedge system of planting.
Landscaping and recreation.
Applied silviculture.
Cull factors for Michigan.
Shelterbelt planting.
Spruce budworm on jack pine.
Survey shows increased cut of firewood on Minnesota farms.
Iowa's conservation plan.

979. December 1935.
The Upper Peninsula branch station.
Compression wood in black spruce.
Extent of shelterbelt protection.
The Denbigh seed scarifier.
Natural reproduction in the Birch Lake plantation.
What is the significance of class of stock?
There's profit in aspen.
Rabbit or deer damage?
Second survey report completed.
Uses of the Abney level.

980. January-February 1936.
The Huron branch station.
Diesel oil eliminates sprouts.
Group selection versus single-tree selection.
White spruce never abundant in Minnesota forests.
Arsenical toxicity of nursery soils.
Aerial photography in forestry.
Actual and "normal" growth.
Bark injury by feeding rodents.
Shelterbelt report out.
Generalized soil maps of the entire United States.
Storage of seed after acid treatments.
The small forest nursery in Europe.
Tree seed manual in preparation.

981. March-April 1936.
The Michigan forest fire experiment station.
Oregon acts to protect restocking burn.
Large forest nurseries in Europe.
Annual research conference.
Effect of spacing on plantation growth.
Heart rot of balsam fir.
New record for fire protection in the Lake States.
Some important trends in European silviculture.
Propagation of mountain ash.
The influence of thinning on crown formation in spruce.
Temperance Valley conversion experiment.

982. May-June 1936.
The North Dakota branch station.
Eastern floods damage trees.
Yields of aspen in the Lake States.
Huron staff visits branch station.
The production of certified nursery stock.
Forests and tuberculosis in the Tennessee Valley.
Influence of storage conditions on white pine seed.
Soil erosion research conference.
Determination of cubic volume in the field.
The Station's library.
Administrative research on the Manistee.
Thirty years of thinning white pine.

983. July-August 1936.
Effect of density of sowing upon winter hardiness of jack pine.
An unusual pruning method.
Shelterbelt effectiveness.
The director to visit Europe.
Management for maximum volume or highest quality in Denmark.
Dry seeds can stand higher temperatures.
The importance of small streams.
The shingle industry of the Upper Peninsula.
Grass sown in bags checks gully erosion.
Yeast from waste pulp liquor.
Conservation education in Minnesota.
Distribution of rainfall during the fire season.

984. September-October 1936.
Land use conference.
The hardships of a seedling's first year.
Squirrels versus jack pine.
Succession demonstrated.
Minnesota forests show increased growth.
Early root development of cottonwood.
More about jack pine seeds.
South Dakota forestry report released.
Does protective coloration extend to tree seed?
European planting practices.
Seed source influences drought resistance of green ash.
Fire danger stations installed.

985. Spring 1937
Notes on European forestry.
Forest inventory completed.
New disease of Norway pine.
Heat, drought or both?
Jack pine seed supply.
Forest survey shows larger timber volume in two states.
Bigger stock - better survival.
Less watering - greater drought resistance.
What are forests worth for flood control?

986. Summer 1937.
Spring or fall for planting?
Girdling pays dividends.
Trees bring benefits to the Danish heath lands.
A new fire danger meter for the Lake States.
Three profits from improvement cuttings.
Shelterbelt experiences in Canada.
The effect of freezing temperature on planting stock.
"Save the pieces."
The effect of weeding on early growth of jack pine.
Rodents and direct seeding.
Planting in the Danish heath.

987. Spring 1938

Progress in fire protection in Michigan.
A quick, accurate method for determining the average size of planting stock.
Deer damage to jack pine plantation in Minnesota.
Chestnut in Upper Michigan.
Girdled aspen good for fuelwood.
Interception of rainfall by herbaceous vegetation.
Percentage of cull for some hardwood-hemlock stands on the Nicolet and Chequamegon National Forests, Wisconsin.
Beaver feeding experiment, Minnesota.
Commercial thinning in dense jack pine is successful.
"It's an ill wind---."
Tip moth attacks.

988. Winter 1939.

Forest survey paints an encouraging picture.
Wisconsin's farm consumption of fence posts largest in Lake States.
A commercial selective cutting in hemlock-hardwoods.
Minnesota paper company tries selective logging.
Forest operations of a Wisconsin lumber company.
Forest industries of Marathon County, Wisconsin.
Opening of jack pine cones at different heights above ground.
When a farmer cuts his own timber. . . .
Squirrels vs. black spruce.

FOREWORD

In January 1949 the Lake States Forest Experiment Station released Station Paper No. 15 which included a complete list of the publications issued by the Station during its first 25 years, 1923 through 1948. Three years have passed and there is a real need to bring this list up to date. Supplement No. 1, therefore, lists all publications issued by the Station from January 1949 through December 1951.

This supplement has been compiled by Helen A. Woodworth, in charge of files and library at the Lake States Forest Experiment Station. The titles have been arranged into eight classes according to subject matter. Within each class the titles have been listed alphabetically by authors, and the writings of each author have been arranged in chronological order. Each publication has been assigned a number. At the end of the supplement there is an index giving the numbers of the articles published by each author.

All publications available for general distribution are designated by *. Those in limited supply, which can be supplied only to schools, libraries, or conservation agencies are designated by **. All other publications listed are no longer available for distribution.

1. FOREST MANAGEMENT AND SILVICULTURE

*989. Arbogast, Carl, Jr. How much does felling large cull trees damage the understory? Tech. Note No. 337, 2 pp., mimeo. July 1950. Pulp & Paper Mag. of Canada 51(12): 190. Nov. 1950.

*990. Arend, John L., and Gysel, Leslie W. Some effects of soil and topography on oak yields in southern Michigan. Tech. Note No. 365, 1 p., mimeo. Oct. 1951.

991. _____ Can hardwood roots transmit chemical herbicides? Forest Farmer 11(1): 15. Oct. 1951.

*992. Engle, LaMont G. Cutting aspen overstory improves growth of young hardwoods. Tech. Note No. 314, 1 p., mimeo. April 1949.

*993. _____ Releasing white pine from oak and aspen. Tech. Note No. 346, 2 pp., mimeo., illus. Jan. 1951.

*994. _____ and Smith, Norman F. Height growth of thinned red pine. Tech. Note No. 351, 1 p., mimeo. April 1951.

*995. Eyre, F. H., and Zillgitt, W. M. Size-class distribution in old-growth northern hardwoods twenty years after cutting. Sta. Paper No. 21, 15 pp., mimeo., illus. July 1950.

*996. _____, and Longwood, F. R. Reducing mortality in old-growth northern hardwoods through partial cutting. Sta. Paper No. 24, 13 pp., mimeo. April 1951.

*997. Longwood, F. R. Ingrowth following cutting in northern hardwoods. Tech. Note No. 352, 1 p., mimeo. April 1951.

*998. _____ Why release young maple from pin cherry? Tech. Note No. 360, 2 pp., mimeo. July 1951.

*999. Noetzel, John R. Farm-woods management in southern Minnesota. Misc. Report No. 6, 28 pp., mimeo. July 1949.

*1000. Neff, L. P. Classifying black spruce by tree vigor and dominance can aid the tree marker. Tech. Note No. 344, 2 pp., illus., mult. Oct. 1950.

*1001. Ralston, R. A. Red pine seedling survival under different levels of stocking. Tech. Note No. 334, 1 p., mimeo. April 1950. Pulp & Paper Mag. of Canada 51(12): 186. Nov. 1950.

*1002. _____ Successful natural jack pine regeneration. Tech. Note No. 363, 1 p., mimeo. Oct. 1951.

*1003. Roe, Eugene I. Balsam fir in Minnesota - a summary of present knowledge. Misc. Report No. 13, 25 pp., mimeo. Sept. 1950.

*1004. _____, and Stoeckeler, Joseph H. Thinning over-dense jack pine seedling stands in the Lake States. Jour. For. 48(12): 861-865. illus. Dec. 1950.

1005. _____ Early release from aspen improves yield of pine plantations. Timber Prod. Bul. (Duluth) 7(2): 10. Oct. 1951.

*1006. Rudolf, Paul O. Handling northern white-cedar stands for wood and wildlife in the Lake States. Misc. Report No. 3, 6 pp., mimeo. Jan. 1949.

*1007. _____ 1949 a poor tree seed year in the Lake States. Tech. Note No. 333, 2 pp., mimeo. April 1950.

*1008. _____ Lake States forest trees produce good seed crop in 1950. Tech. Note No. 349, 2 pp., mimeo. Jan. 1951.

*1009. _____ Chemical control of brush and tree growth for the Lake States. Misc. Report No. 15, 30 pp., mimeo. Jan. 1951.

**1010. Young, Leigh J., and Scholz, Harold F. Some results of selection cutting in the Eber White Woods, Ann Arbor, Michigan. Papers Mich. Acad. Sci., Arts, and Letters 33: 39-56. 1947. (Publ. 1949.)

1011. Scholz, Harold F., and DeVriend, A. J. Improvement cuttings pay dividends in Wisconsin farm wood lots. Lake States Timber Digest 5(10): 1. Aug. 1951.

**1012. Stoeckeler, Joseph H. Alkali tolerance of drought-hardy trees and shrubs in the seed and seedling stage. Proc. Minn. Acad. Sci. 14 (1946): 79-83. (Publ. 1950).

*1013. _____, and Heinselman, M. L. The use of herbicides for the control of alder brush and other swamp shrubs in the Lake States. Jour. For. 48(12): 870-874. Dec. 1950.

1014. _____ Review of "A Research on the Regeneration of Birch in South Finland," by Risto Sarvas. 91 pp., illus. Metsatieteellisen Tutkimuslaitoksen Julkaisuja 35(4). Forest Research Institute, Helsinki, Finland. 1948. Jour. For. 49(6): 458-459. June 1951.

*1015. _____ Chemical sprays reduce right-of-way maintenance costs. Tech. Note No. 359, 1 p., mimeo. July 1951.

*1016. Zasada, Z. A. Aspen management problems of the Lake States. Misc. Report No. 10, 23 pp., mimeo. June 5, 1950.

*1017. Zehngraff, Paul. Growth of a managed pine forest. Tech. Note No. 310, 2 pp., mimeo. Jan. 1949.

*1018. _____, and von Bargen, John. Chemical brush control in forest management. Jour. For. 47(2): 110-112. Feb. 1949.

1019. _____ A method of regulating cut in individual stands. 6 pp., mimeo. March 8, 1949.

*1020. _____ Aspen as a forest crop in the Lake States. Jour. For. 47(7): 555-565. July 1949.

*1021. _____ Monetary yields from a managed pine forest. Tech. Note No. 330, 1 p., mimeo. Jan. 1950.

*1022. Zillgitt, W. M. Basal area in merchantable trees as an expression of stocking in northern hardwoods. Tech. Note No. 324, 1 p., mimeo. Oct. 1949.

*1023. _____ Quality of reproduction following partial cutting of northern hardwoods. Jour. For. 48(5): 324-325. May 1950.

*1024. _____ Does the partial cutting of northern hardwoods result in inferior reproduction? Tech. Note No. 340, 1 p., mimeo. July 1950.

*1025. _____ Disking to increase stocking in aspen stands. Tech. Note No. 357, 1 p., mimeo. July 1951.

*1026. _____ Converting mature northern hardwood stands to sustained yield. Jour. For. 49(7): 494-497. July 1951.

2. REGENERATION (SEED, NURSERY, PLANTING)

1027. Aldous, Shaler E. Experimental planting of food and cover for deer. USDI, Fish & Wildlife Service, Wildlife Leaflet No. 320, 9 pp., mult., illus. May 1949.

1028. Krefting, Laurits W., and Roe, Eugene I. The role of some birds and mammals in seed germination. Ecol. Monog. 19(3): 269-286. July 1949.

*1029. Ralston, R. A. Is jack pine tree growth affected by age of parent seed? Tech. Note No. 358, 1 p., mimeo. July 1951.

*1030. Roe, E. I. Dense seed spots produce spindly jack pine seedlings. Tech. Note No. 306, 1 p., mimeo. Jan. 1949. Jour. For. 476: 480. June 1949.

1031. _____ Frozen red pine planting stock shows fair survival. Jour. For. 47(7): 566. July 1949.

*1032. _____ Sphagnum moss retards black spruce regeneration. Tech. Note No. 321, 1 p., mimeo. Oct. 1949. Jour. For. 47(12): 960. Dec. 1949.

1033. _____ Pine plantations a good investment. Blackduck American (6th Annual Forest Fire Prevention Ed.) 49(21): 2. April 20, 1950.

*1034. _____ Early release from aspen improves yield of pine plantations. Tech. Note No. 353, 1 p., mimeo. April 1951.

*1035. _____ Seeding jack pine after fire. Forest and Outdoors 47(10): 20-22. illus. Oct. 1951.

1036. Chapman, Arthur G., McQuilkin, William E., Mirov, N. T., Roe, Eugene I., Rudolf, Paul O., and Wakeley, Philip C. (co-authors). WOODY-PLANT SEED MANUAL. USDA Misc. Publ. No. 654, 416 pp., illus. June 1948.

*1037. Rudolf, Paul O. Hybrid poplar planting in the Lake States. Sta. Paper No. 14, 17 pp., mimeo. Dec. 1948.

*1038. _____ Scotch pine seed sources for northeastern Minnesota. Proc. Minn. Acad. Sci. 16(1948): 25-26. (Publ. 1950.)

1039. _____ Review of "Boomzaden: Handleiding Inzake Het Oogsten, Behandelen, Bewaren en Uitzaaien van Boomzaden (Tree seed: a guide to its collection, treatment, storage, and sowing.) By Nederlandsche Boschbouw Vereeniging. 171 pp. Ponsen and Looijen, Wageningen. 1946. Jour. For. 47(3): 225-226. March 1949.

*1040. Rudolf, Paul O. Pelleted seed for reforestation. Misc. Report No. 5, 13 pp., mimeo. June 14, 1949.

1041. _____ Review of "Seed Storage with Particular Reference to the Storage of Seed of Indian Forest Plants," by T. V. Dent. Indian Forest Records (New Series) Silviculture, 7(1): 1-134. Dehra Dun, India. 1947. Jour. For. 47(8): 656-657. Aug. 1949.

*1042. _____ Recovery of winter injured pines. Tech. Note No. 323, 1 p., mimeo. Oct. 1949.

*1043. _____ Winter damage and seed source of planted pines in northern Minnesota. Proc. Minn. Acad. Sci. 17(1949): 74-79. (Publ. 1951.)

*1044. _____ First the seed, then the tree. 1949 Yearbook of Agric.: 127-135.

*1045. _____ Variation in Scotch pine. Papers Mich. Acad. Sci., Arts, & Letters 34(1948): 57-68. (Publ. 1950.)

*1046. _____ Cold soaking - a short-cut substitute for stratification? Jour. For. 48(1): 31-32. Jan. 1950.

*1047. _____ Forest seed collectors, processors, and dealers in the Lake States. Misc. Report No. 8, 3 pp., mimeo. March 15, 1950.

*1048. _____ Forest plantations in the Lake States. USDA Tech. Bul. No. 1010, 171 pp., illus. Aug. 1950.

*1049. _____ Certifying forest seeds. Misc. Report No. 14, 6 pp., mimeo. Sept. 1950.

*1050. _____ A test of pelleted jack pine seed. Jour. For. 48(10): 703-704. Oct. 1950.

*1051. _____ Stand density and the development of young jack pine. Jour. For. 49(4): 254-255. April 1951.

1052. _____ Nursery behavior of red pine stock of different seed origins. USDA, Forest Service, Tree Planters' Notes No. 8, pp. 3-4. Nov. 1951.

1053. Stoeckeler, J. H. Killing weeds with mineral spirits. Amer. Nurseryman 89(7): 11, 55, 56. April 1, 1949.

1054. _____ Mineral spirits as selective herbicides in conifer nurseries. Sci. Monthly 68(6): 419-420. June 1949.

*1055. Stoeckeler, J. H. Control of weeds in conifer nurseries by mineral spirits. Sta. Paper No. 17, 23 pp., mimeo. May 1949.
